

PMSI

POULTRY MANAGEMENT SYSTEMS

DASH

Web-Based DASHboard for web browsers

By the simple method of logging into a web-based dashboard, managers are able to access production and processing data easily without the need for client software (Teamviewer, VNC, etc). DASH allows access from virtually any computer, phone, or tablet. As the virtual office continues to grow, producers will be able to compete more efficiently.

Advantages:

- Support for mobile browsers
- Easier user interface
- Better remote access
- Accelerated critical system messaging
- NOAH historical data is extended beyond 30-days
- Better support for online and offline access modes
- User adjustable display screens which can be customized for you

DASH is part of PMSI Integrated Solutions

ENVIRONMENTAL CONTROL

- Control and monitor every aspect of your environment
- Maximize your feed conversions with feed scales which interface with **CIH**[®] hardware

EGG FLOW CONTROL

- Egg counting and flow control
- Verification of cross conveyor operations

HACCP MONITORING AND CONTROL

- Cooler, Rinse water, Wash water temperatures
- Chlorine, PH levels
